EDUCATION

University of Pennsylvania **Philadelphia, PA**

Master of City Planning (Concentration in Smart Cities) Expected May 2027

- **Relevant Courses:** Land Use and Modeling, Public Policy Analysis, Statistics and Data Mining, AI for Urban Sustainability, Geospatial Data Science in Python

University of California, Irvine, **Irvine, CA**

B.A. in Urban Studies and B.A. in Criminology, Law & Society (With Specialization in GIS) June 2025

- **GPA:** 3.92/4.0
- **Merit Award:** Campuswide Honors Collegium Scholar, Regents Scholar, Dean's Honor List
- **Relevant Courses:** Spatial Analysis, Advanced GIS, Environmental Sustainability, Climate and Policy

WORK EXPERIENCE

TDTC Global-Property Development **Austin, TX (Hybrid)**

Geospatial Analyst Summer 2026

- Evaluated data-center sites using GIS, assessing infrastructure feasibility, utility and telecommunications access, ROW/jurisdictional constraints, and potential development conflicts.
- Produced ArcGIS maps and concise feasibility reports to identify infrastructure conflicts, site risks, and regulatory data to support site-selection and development decisions
- Built an AI-assisted workflow to automate GIS-based site-suitability analysis for future development.

Law Office of Bruce C. Bridgman **Irvine, CA**

Legal Assistant Jan 2024-Mar 2024

- Researched zoning, land use, municipal codes, and property regulations affecting infrastructure and development projects, and identified missing information, inconsistencies, and compliance issues.
- Drafted 40+ legal memoranda and organized 100+ documentary evidence records into clear written summaries for regulatory review and stakeholder communication.

PROJECT EXPERIENCE

Packer Park Stadium District Analysis **Philadelphia, PA**

Planning Studio Project Spring 2026

- Supported local-government infrastructure planning by analyzing site conditions and constraints to inform project priorities.
- Created site-suitability maps and spatial overlays to visualize development patterns, utilities, and opportunity areas, supporting redevelopment and district planning.

SEPTA Bus Stop Ridership and Transit Infrastructure Analysis **Philadelphia, PA**

GIS and Predictive Modeling Project Spring 2026

- Used Excel, R, and GIS to clean, validate, and analyze transportation infrastructure data, building an automated workflow for 7,588 SEPTA bus stops, integrating SEPTA ridership with demographic, land-use, amenity, and transportation-network data.
- Developed nested Poisson regression models to predict weekday stop-level ridership; validated performance and mapped residuals to identify spatial patterns of over- and under-prediction, supporting transit infrastructure and bus stop planning.

Urban Heat Island and Climate-Resilient Infrastructure Mapping **San Bernardino County, CA**

GIS Research Project Spring 2025

- Used ArcGIS Pro to integrate and analyze land cover, air temperature, green infrastructure, and transportation corridor data, identifying high-risk heat zones and priority areas for climate-resilient infrastructure investment.
- Developed ArcGIS Online web maps and an interactive StoryMap to visualize urban heat patterns and communicate planning strategies for tree planting, green corridors, reflective pavement, and sustainable transportation infrastructure.

SKILLS

- **Technical Skills:** ArcGIS Pro, ArcGIS Online, R (tidyverse, dplyr, sf), AI Agent, Microsoft Office (Word, Excel, PowerPoint), Python, Adobe software, Rhinoceros, AutoCAD
- **Language:** Bilingual in English and Mandarin, basic in Cantonese, Spanish, Korean, and Japanese
- **US Citizen**: Authorized to work in the United States without sponsorship.
